

At Green Mainland, we believe in the power of personalization. Our windows and doors are crafted to match your lifestyle and vision. Whether renovating a residence or building a dream home, our designs blend beauty, durability, and performance.

ROOTED IN DALLAS, TRUSTED **ACROSS THE WORLD**

Green Mainland brings luxury and innovation to every project. With hurricanecertified systems, advanced insulation, and fully customizable designs, we create timeless solutions for both residential and commercial spaces.

PIVOT DOORS

Make the ultimate first impression

With flush profiles inside and out, our pivot entrance doors embody balance and innovation. Available in aluminum and specialist glass finishes, each door is crafted with laminated security glass as standard – triple or quadruple glazed for peace of mind. Custom design services ensure your entrance is as unique as your vision.

DOORS THAT DO IT ALL

AUTOMATIC REBOUND DROP SEALING

As the door closes, our intelligent sealing strip descends gracefully, forming a dual barrier against wind, rain, and drafts. When opened, it retracts silently, preserving seamless movement while ensuring your home remains secure and efficient.

Get a quote: greenmainland.com/quote

Hidden seals descend into place, compressing against the track to form a dual cavity barrier. This design blocks air and water infiltration, minimizes noise, and maximizes comfort – all while lowering energy costs.

FRENCH DOORS

Classic form meets contemporary engineering. Our French doors blend elegant proportions with advanced aluminum profiles for stability, thermal insulation, and security. Perfect for both traditional and modern homes, they bring character and light to every interior.

SLIDING DOORS

Our ultra-slim sliding system features a 13/8" (35mm) sightline profile, virtually frameless to maximize views. Oversized panels, up to 5 meters high, glide effortlessly within recessed frames that disappear into walls, ceilings, and floors. The result: a threshold-free transition from indoors to outdoors, blending architecture with nature.

LIFT & SLIDE

Strength & Elegance

Crafted from heavy-duty aluminum alloy, our lift & slide doors meet AAMA CW CLASS standards, withstanding water resistance above 720pa. Perfect for challenging climates, they combine effortless movement with sleek modern design. Enjoy panoramic views, abundant light, and durable performance that elevates your living space.

BIFOLD DOORS

Flexible Living

Our high-performance bifold system combines minimalist elegance with advanced engineering. Designed for seamless functionality, these doors offer exceptional thermal insulation and smooth operation, thanks to hardware crafted exclusively for folding systems.

Whether opening inward or outward, the system adapts effortlessly, accommodating an even number of panels (2, 4, and beyond) to suit spaces of any scale. Both inward and outward openings are achieved using the same sleek profiles, ensuring design consistency throughout.

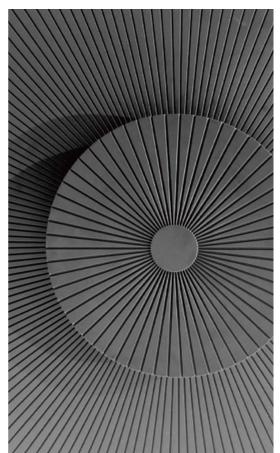

Our patented automatic rebound latch allows each door leaf to glide effortlessly into the track, securing itself automatically. This intelligent mechanism elevates ease of use, enhancing both convenience and security.

ARTISAN DOORS

Where design becomes sculpture

Each piece is hand-crafted to be a true expression of individuality. Every creation is shaped with precision and imagination. No molds. No limits. Just craftsmanship that turns an entrance into a work of art.

THE ART OF THE ENTRY

Our artisan collection showcases the beauty of custom design – forged, sculpted, and finished by hand. Every curve, petal, and line is carefully shaped to reflect the artistry within your home.

Whether you envision elegant florals, geometric symmetry, or a one-of-a-kind concept, our designers bring it to life with unmatched craftsmanship. Each piece is unique – a creation that cannot be replicated.

GARAGE DOORS

More than protection, our garage doors are a design statement. Engineered for durability and quiet operation, they feature premium finishes and robust construction, seamlessly blending into luxury residential or commercial spaces.

SUNROOMS

Bring the outdoors in with a custom Green Mainland sunroom. Our aluminum frames and expansive glass panels fill your space with natural light while keeping it comfortable year-round.

Tilt & Turn Windows

WINDOWS THAT FRAME THE FUTURE

Fixed Windows

Bifold Windows

Casement Windows

From fixed glazing to pivoting innovations, our windows are designed to maximize efficiency, light, and beauty. Every frame is built with thermal break technology and multi-layer sealing systems, ensuring performance as refined as the design.

ARGON & LOW-E GLASS

Intelligent Performance

Argon gas, denser than air, enhances insulation by reducing thermal transfer. When combined with Low-E glass coatings, it minimizes heat loss while reflecting radiant heat, reducing both cooling and heating costs. Together, they create interiors that stay comfortable year-round while cutting energy expenses.

MULTI-POINT LINKAGE LOCKS

Designed for total security, our multi-point locks engage at three positions—top, middle, and bottom—for a firm closure.

- Mechanical Option: traditional reliability with robust strength.
- Electric Option: smart integration with remote monitoring and control.
